

OBAIAH MOPURI

Bengaluru, India, 562114 | +91 9515485375 | mopuriobaiah45@gmail.com | **Portfolio:** chinna-portfolio-weld.vercel.app

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of hands-on experience architecting and delivering enterprise web applications, RESTful microservices, and high-performance backend platforms. Specialized in **.NET Core, ASP.NET Core, C#, MS SQL Server, Dapper/EF Core, and Angular**, with core domain expertise in **Sales Force Automation (SFA) SaaS platforms** and bi-directional enterprise ERP data pipelines (SAP, Microsoft Dynamics 365). Proven track record of developing scalable mobile sync APIs, multi-tenant architectures, journey planning workflows, and automated enterprise reconciliation systems.

TECHNICAL SKILLS

Languages & Frameworks:	C#, .NET Core 6/8, ASP.NET Core, ASP.NET MVC, Web API, ADO.NET, Angular, JavaScript, TypeScript, Blazor, HTML5, CSS3
Databases & ORM:	MS SQL Server (Stored Procedures, Index Tuning, Query Optimization), SQLite, Entity Framework Core, Dapper
Integrations & Architecture:	RESTful APIs, SOAP Web Services, SAP ERP Integration, Microsoft Dynamics 365 Sync, Role-Based Access Control (RBAC)
Tools & Methodologies:	Git, CI/CD pipelines, Postman, Swagger/OpenAPI, Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer | Micro Labs *July 2025 – Present*

Project: UNNATI (Enterprise Microservices & ERP Integration)

- Architected and scaled core RESTful microservices for the **User Management Service (UMS)**, establishing cross-platform authentication, authorization, and granular role-based access control (RBAC).
- Engineered bidirectional integration pipelines with **SAP ERP**, synchronizing real-time employee lifecycle data, automated onboarding workflows, and enterprise payroll records.
- Developed and deployed the **Visitor Management Service (VMS)**, managing security gate authorizations, host approval hierarchies, automated alerts, and visit audit trails.
- Optimized SQL Server schema design, indexing strategies, and ORM query pipelines to deliver sub-second response times across high-concurrency microservices.

Software Engineer | WINIT (Product-Based SFA Platform) *July 2022 – June 2025*

Engineered core platform capabilities and client-specific business modules for WINIT's flagship enterprise Sales Force Automation (SFA) product suite, providing web dashboards, backend services, and mobile sync APIs for global FMCG and retail enterprises.

Sadafco & Al Rasheed Foods (Enterprise SFA Deployments)

- Engineered high-throughput asynchronous Excel import/export pipelines to handle massive SKU catalogs, tiered price books, and stock audits.
- Built end-to-end pre-sales workflows, field journey planning algorithms, route optimization logic, and automated warehouse inventory allocation.

- Designed multi-tier approval hierarchies for trade discounts and promotional campaigns, complete with automated email alerts and on-demand PDF invoice generation.

Panasonic SFA (SOAP & ERP Data Sync)

- Developed robust SOAP integration bridges connecting WINIT's SFA platform with customer legacy ERPs to handle real-time stock balances and automated invoice sync.
- Enhanced audit monitoring features and field representative activity dashboards using Angular and ASP.NET Core.

Fifood & LGFMCG (Pricing & Field Execution Modules)

- Delivered core SFA functionality for sales returns, asset liquidation tracking, target vs. achievement analytics, and complex price management.
- Created high-performance SQL stored procedures, views, and reporting functions supporting custom analytical PDF/Excel downloads.

AI Amal Ice Creams (Van Sales & Dynamics 365 Integration)

- Built mission-critical mobile backend and web services powering Van Sales operations, instantaneous order capture, cash settlement, and on-van promotions.
- Integrated **Microsoft Dynamics 365** via REST APIs to ensure bidirectional synchronization of master data (customers, products, pricing, and live inventory).
- Implemented journey plan scheduling, beat tracking, and role-based permissions for field reps and sales managers.

EDUCATION

- **B.Tech in Electronics & Communication** | IBVE College, Bangalore, Karnataka (May 2020)
- **Intermediate (10+2)** | Sri Datta Sai Junior College, Porumamilla, Andhra Pradesh (May 2016)
- **SSC (10th)** | Vijaya High School, Porumamilla, Andhra Pradesh (May 2014)

ACTIVITIES & PROFESSIONAL INTERESTS

Building full-stack web and mobile applications, microservices architecture, system performance tuning, and exploring cloud-native technologies.
